

# entra Disinfection System

Unmanned disinfection system  
for ENTRA vehicles  
DIBS-1500

+ An eco-friendly unmanned disinfection system developed by technology accumulated for nearly 20 years.

## Specification

Type	Nozzle Spray Method
Control device	Electronic control
Power	3-phase/380V or single-phase 220V
Automatic Method	Detects vehicles with a heat-infrared sensor
Spray Method	Hood coil method spray blocking
Disinfection direction	Unidirectional sides and bottom (bidirectional selectable)
Machine Room (m)	2,5 x 2 x 1,8 (Wall insulation)
Equipment Spec. (m)	4,5 x 6 x 4,5 (W x L x H)
Prevent frostbite	Hot-wire coil
Supply medicines	Automatic supply with metering pump

## Composition of unmanned vehicle disinfection systems

Steam device

Control panel (self-diagnosis)

Lower base (water collection for disinfection)

Prevents vehicle from slipping

Near-infrared sensor

Solenoid valve

Power sprayer
